

KIT Digital | KITD | Summary | Profile

KIT digital (KITD) is a leading video management software and services company. With experience that runs the gamut from traditional broadcast systems engineering to “over-the-top” IPTV applications, we are uniquely positioned to deliver complete video solutions to our clients and power the transformation from traditional broadcast to multiscreen broadband TV. Cosmos and Cloud, our video asset management systems, enable leading broadband media companies to produce, manage and deliver multiscreen socially-enabled video experiences to audiences wherever they are.

Clients in over 50 countries

KIT digital provides software and related services to almost 2,500 customers in over 50 countries through our corporate headquarters in New York and principal offices around the globe.

Defining the Future of Television

KIT digital is at the forefront of a global transformation in the entertainment industry. Our integrated combination of software and services enable the world's largest cable companies, entertainment brands and corporations to reliably deliver their content across more screens, in revolutionary ways. KIT digital's innovative software platforms make it easy to digitally deliver video content to any screen.

The Advantage

The KIT Platform's broadcast-grade, modular architecture enables it to deliver highly customized solutions that meet the demands of the world's most advanced and large-scale broadband video deployments. Each project is custom designed and completely unique – a key advantage of KIT digital's flexible platform.
