

Power picks for Monday 07-18-2011, HEV, ACPW

Written by staff

Monday, 18 July 2011 15:22 -

HEV - Ener1, engages in designing, developing, and manufacturing rechargeable lithium-ion batteries and battery pack systems for energy storage in the United States and South Korea.

Very Attractive, Bouncing back from

52WK

Lows.

ACPW - Active Power, manufactures and markets critical power quality solutions. It provides various products that deliver continuous clean power; and protects customers from voltage fluctuations and frequency fluctuations.

Active Power offers the CleanSource UPS, a battery free un-interruptible power supply system (UPS) that integrates electronics and flywheel energy storage system.

Very Attractive, keep an eye.
