Lift Gas could provide a lift to your portfolio AlumiFuel Power (AFPW.OB) is displaying its 4th generation Hydrogen Generator which has been designed and developed from the feedback received from potential Military client(s). The PBIS-1000 could generate 264 Gallons of Hydrogen in just 20 Minutes! This is a 'Total Green' Technology with Civil and Defense applications. Potential customers include NASA, Department of Defense and the Weather Bureau. The unit will be on display at The American Meteorological Society conference in Atlanta. The company has partnered with world class Manufacturer APEX and the World's Largest weather balloon distributor, Kaymont Consolidated. 2010 could be a pivotal year for this diversified alternative energy company with multiple product lines.
