Hot stock Picks Thursday 11/18/10

As the opening bell sounded, GM peeled off with vengeance, there were no shortage of investors who wanted to hitch a ride with GM today.

The credit for GM's success (100%) goes to the Administration, yes **the OBAMA administration**. We know some people have really hard time uttering those two words, only ignorants and fools could have such pride, we are investors and traders, we live and die by the facts and numbers.

The best thing our government ever did in recent memory, saved an American Icon, an Industrial Pioneer, saving and creating thousands of jobs in the process.

Ask the people who actually work directly or indirectly for GM in Ohio, Michigan and Texas.
