[Jingwei International](#) [JNGW](#) saw a burst of activity in its stock in late afternoon trading, The stock jumped

Almost 80% on high volume before settling @ 50% gain for the day. The company has no news, one reason could be that the stock is trading now at over \$5 Dollars which may attract additional interest from the institutional investors. The stock started trading on the NASDAQ just two weeks ago. It could test the \$5 level unless there is some news from the company

to justify such a huge jump.
