EPA approved product could save the Gulf Coast Disaster

EPA approved! Unique product Small Company comes to the rescue The Big BP BlowUp!

Fibertect, simple and unique technology, developed by Prof. S. Ramkumar of [Texas Tech](#) and manufactured by

[First Line Tech](#)

could save millions of Birds,
Fish and Marine Mammals.

Its just heartbreaking to watch and feel so helpless, as a nation we could project our power in matter of minutes at remote corners of the Globe, yet we couldn't close the damn hole. Plug the Damn Hole NOW!

EPA in its wisdom fast tracked and approved this product and could be in the hands of BP contractors and government agencies dealing with this unprecedented massive disaster.
